

Stockmaster[™] Mezzalad

Fast, safe and easy access to space you've already paid for!

- Provides access to Mezzanines, Lofts and Loading Docks and other elevated work areas
- Stores out of the way when not in use with a simple lift and push action
- Includes an upper floor gate and two hand rails to assist safe and easy climbing
- May be moved to different locations
- **Is fast and easy to install with just two universal fixing brackets**

Mezzalad features a space saving mechanism which allows it to be stored flat against the wall when not in use, and is brought to the operative position with a simple lift and pull action.

At 600 mm, the step width provides comfortable access, and two hand rails are included for safe and easy climbing. The side rails are lengthened to provide hand railing extending 900 mm beyond the upper floor, enabling safe step through access to the upper floor while maintaining a hand hold.

An upper floor gate creates a much safer product.

A Safety Gate is provided at the upper floor level to maintain the integrity of the perimeter railing. All risks associated with operating the gate while standing on the ladder are eliminated as the gate may be opened or closed with the operator standing fully on the upper floor.

The ladder is fastened at the upper floor level. Installation is simple with two universal brackets allowing fastening to be made either to the floor or wall and the ladder may be secured with bolts or screws.

The VH series Mezzalad automatically adjusts to any floor height between the given minimum and maximum service height and suits the majority of applications. For other applications the made to order CM series is available.

Mezzalad is designed to comply with relative elements of Australian Standard AS 1892:1.1996 for portable metal ladders.
